Drillers can receive one (1) hour of credit from the annual OSHA Hazwopper 8 hour refresher course if they submit a current copy of the certificate.

All outside training requires preapproval by the Division of Water to ensure training credit. If you do not receive preapproval you may not receive training credit depending on the course(s) content.

Kentucky Ground Water Association's Annual Well Driller Workshop & Expo is held in March 1 and. Contact info This is the preferred training source for Kentucky Water Well Drillers required annual training.

The Virginia Water Well Association & South Atlantic Jubilee usually send a course list to the DOW for approval before the training event so KY drillers who attend can determine which courses are already pre-reviewed by the Kentucky Division of Water.
